

# Wahid Ali Wahid Hussien

Computer science student

Mail : [wahidqandill@gmail.com](mailto:wahidqandill@gmail.com) Phone : +201098709889 Address : Giza ,Cairo, Egypt

## Summary :

As a Computer Science student with experience in Software Dev and student work, I am seeking to use my education and prior work experience to secure a job that will enable me to further develop my skills and knowledge in the field of Computer Science. I am eager to build upon the skills I have already gained, and am determined to make a positive difference with any opportunity given to me.

## EXPERIENCE

### Delta Technological University

Student	2021	2025	Elmonofia-Egypt
---------	------	------	-----------------

### ITI summer training

Student	2022/7/1	2022/8/19	Elmonofia-Egypt
---------	----------	-----------	-----------------

My responsibilities while studying at Delta Technological University included:

Developing software applications and scripting Writing, editing and testing programs

Providing support to research teams for computer-related issues Testing new applications for compatibility, fixes, and bug-fixing. Developing system logs and reporting

Analyzing system requirements to develop and design programs Documenting software requirements and writing technical documentation.

## EDUCATION

BS in Computer science Delta Technological University

I'm studying at Delta Technological University a Bachelor's degree in Computer Science. I specialize in software engineering and database management. Throughout my course of study, I gained experience working on numerous software development projects, including developing a web application. I am proficient in a variety of programming languages, including Java, C , C++, and C#. In addition, I have a strong understanding of object-oriented programming, data structure algorithms, and system development lifecycles.

Proficient in Software Engineering and Database Management

Skilled in Java, C , C++, and C# Programming Languages

expertise in Object-Oriented Programming, Data Structure Algorithms, and System Lifecycle Development Gained Experience Working on Numerous Software Development Projects

## PROJECTS

Pharmacy System :

This project I have completed during my internship at ITI summer training . I designed, developed and implemented an automated system using object-oriented programming concepts and relational databases. The system was able to seamlessly transfer data between two remote systems. Additionally, I implemented efficient data validation techniques and error-handling procedures to reduce the amount of time spent on debugging. As a result, I was able to improve the productivity of the system.

Pharmacy system : [GitHub repo](#)

Banking System :

Description:

Banking System full control and easy to add, delete, update, find and store clients data

This project was developed with C++

Banking System : [GitHub repo](#)

Collage management system

Description:

Second project is Collage management system that is like a database for a collage,

I developed it with C++ and with LinkedList structure for storing collage data,

By using this system, you will be able to

1-Add new students, teachers with their information in separated tree

2-Modify stored data

3-Delete, Display data in any single tree

## CERTIFICATIONS

### Problem solving with C++

hacker rank 20/Apr/2023 Egypt

### SQL Basic

hacker rank 13/May/2023 Egypt

### Computer network fundamentals

ITI Mhara tech 22/July/2022 Egypt

### Fundamentals of RHEL

Redhat 14/July/2023 Egypt

### Introduction to DevOps

IBM 30/July/2023 Egypt

### Algorithms and problem solving LV1

Programming advices 31/Aug/2023 Egypt

### Algorithms and problem solving LV2

Programming advices 31/Aug/2023 Egypt

### Algorithms and problem solving LV3

Programming advices 19/Sep/2023 Egypt

### Programming using C++

Programming advices 10/Sep/2023 Egypt

## SKILLS

Computer science fundamentals

Software development life cycle

Algorithms and data structures

Database and SQL concepts

Strong Database programming SQL, Oracle)

Programming languages C , Java, C++ and C#)

Strong knowlage in OOP

Web development

Version control (Git)

Distributed system ( GitHub,Gitta)
