CAREER OBJECTIVE

Career Objective: As a Computer Science student with experience in Software Dev and student work, I am looking to use my education and prior work experience to secure a job that will enable me to further develop my skills and knowledge in the field of Computer Science. I am eager to build upon the skills I have already gained and am determined to make a positive difference with any opportunity given to me.

EXPERIENCE

Delta technological university

Student 2021 2025 Egypt

My responsibilities while studying at Delta Technological University and self-studying included:

- ♦ -Developing software applications and scripting
- ♦ Writing, editing, and testing programs
- ♦ -Supplying support to research teams for computer-related issues
- ♦ Testing new applications for compatibility, fixes, and bug-fixing.
- ♦ -Developing system logs and reporting
- ♦ -Analyzing system requirements to develop and design programs
- ♦ Documenting software requirements and writing technical documentation.
- ♦ -Works with different OS Unix-like like Linux with its distributions
- ♦ -Worked with AGILE methodology and small batches

EDUCATION

BS in Computer

science at

Delta technological

university

I am studying at Delta Technological University for a bachelor's degree in computer science. I specialize in software engineering and database management. Throughout my course of study, I gained experience working on many software development projects, including developing web applications. I am proficient in a variety of programming languages, including Java, C, and Python. In addition, I have a strong understanding of object-oriented programming, data structure algorithms, and system development lifecycles.

- ♦ Proficient in Software Engineering and Database
- ♦ ManagementSkilled in Java, C, C++, and Python
Programming Languages
- ♦ ability in Object-Oriented Programming, Data Structure Algorithms, and System Lifecycle
- ♦ DevelopmentGained Experience Working on Numerous Software Development Projects

PROJECTS

My First Project

Blue lock

Description:

My First Project was a project I completed during my internship at Delta technological university. I designed, developed, and implemented an automated system using object-oriented programming concepts and relational databases. The system was able to seamlessly transfer data between two remote systems. Additionally, I implemented efficient data validation techniques and error-handling procedures to reduce the amount of time spent on debugging. As a result, I improved the system's productivity.

Collage management system

Description:

Second project is Collage management system that is like a database for a collage, I developed is with C++ and with LinkedList structure for stores collage data, By using this system, you will be able to

- 1-Add new students, teachers with their information in separated tree
- 2-Modify stored data
- 3-Delete, Display data in any single tree

Collage management system [Upgrade]

Description:

Second project is Collage management system that is like a database for a collage, I developed is with C++ and with LinkedList structure for stores collage data, By using this system, you will be able to

In this version I developed this system in Java for provide a GUI (graphical user interfaces) It is still providing these features below:

- 1-Add new students, teachers with their information in separated tree

2-Modify stored data

3-Delete, Display data in any single tree

SKILLS

- ♦ Computer science fundamentals
- ♦ Small batches pipeline
- ♦ UNIX like operating systems
- ♦ Devops foundation
- Software development life cycle
- Algorithms and data structures
- Database and SQL concepts
- ♦ Strong Database programming SQL, Oracle)
- ♦ Programming languages C, C++,
- ♦ Java, Python) Object-oriented design and analysis
- ♦ Web and mobile development
- ♦
- ♦
